The Bulletin is the official organ of the NIHON JUI SEIMEI KAGAKU DAIGAKU, or Nippon Veterinary and Life Science University, formerly known as Nippon Veterinary and Zootechnical College, and is published annually by the institution at 1-7-1, Kyonan-cho, Musashino-shi, Tokyo 180-8602, Japan.

It mainly contains articles originally written by the members of the faculty on their scientific and technical research work mostly done during the year concerned. To these are added the summaries of theses submitted to the faculty for partial fulfillment of the requirements for the Doctor's degree in Veterinary Medicine and Applied Life Science, and Master's degree in Veterinary Nursing and Technology and Applied Life Science, and the list of works in each division of the university, which were presented during the previous year.

The Bulletin is to be distributed to schools and institutions generally on an exchange basis with regard to publications. Any of those organizations is cordially invited to establish such relationship with this university. Any individual may subscribe for it by making remittance of 20 U.S. dollars or equivalent a copy to this university at the above-mentioned address.

Back numbers of *The Bulletin*, if available, can be obtained from this university at the cost of 20 U.S. dollars or equivalent per copy.

All communications relating to *The Bulletin* are requested to be addressed to the Editors, Nippon Veterinary and Life Science University, 1-7-1, Kyonan-cho, Musashino-shi, Tokyo 180-8602, Japan.

目 次

総 説

- ラットの甲状腺機能低下症で認められる副腎および性腺機能障害：薬物誘発および先天的甲状腺機能低下モデルを用いた研究……………藤平篤志………… 1

ト ピ ッ ク

- 神奈川県野生化アライグマにおける繁殖生物学的特性：メスの出生時期は初産にどのような影響を与えるか？……………加藤卓也………… 10
- メトホルミン投与によるニワトリ血液中マンノース濃度の変化と糖新生系酵素の mRNA 発現量および活性の変動……………佐藤稲子………… 16
- 幼雛期ニワトリの中樞インスリン介在性摂食調節機構……………白石純一………… 22
- Lambeth Homilies* と *Trinity Homilies* における現在分詞の用法と形態について ……嶋崎敏彦………… 28

梅野信吉賞受賞記念

- てんかんと MRI を主軸とした脳疾患の基礎的・臨床的研究 ……長谷川大輔………… 35

原 著

- ラットの早期離乳による成熟後の不安傾向の増大：n-3 不飽和脂肪酸濃度に及ぼす影響……………野瀬 出・松本浩毅・柿沼美紀………… 42
- 絶滅危惧種の交通事故の時間・空間パターン：イリオモテヤマネコの交通事故……………大坂元久・岡村麻生………… 51
- 永続的所有を表す叙述表現に関する英語と日本語の比較：
Stassen の類型論研究に基づいて ……松藤薫子………… 60
- 口語英語研究（4）人と別れるときの挨拶表現に関して ……木戸 充・Stuart J. Sanderson………… 71
- 日本初の国立重度知的障害児施設，秩父学園誕生の背景
——ニーズ分析と入園事例の検討を中心に——……………中 瀧 洋・園 川 緑………… 87
- 長野県上田市における家庭養護婦派遣事業の「運営」に関する一考察……………中 瀧 洋………… 98

博士（獣医学，応用生命科学）論文，修士（獣医保健看護学，応用生命科学）論文の要旨（英文）

- < 博士（獣医学） >
- 白癬菌の遺伝子操作に関連する分子生物学的技術の研究開発……………Mohamed Mahdi ALSHAHNI…………106
- てんかん原性焦点診断における臨床的・基礎的研究：非侵襲的焦点診断と新規てんかんモデル動物の開発……………桑原孝幸…………108
- ラットの超音波による母子相互関係における神経内分泌学的研究……………Pudcharaporn KROMKHUN…………111
- 犬におけるチオレドキシンのバイオストレスマーカーとしての有用性に関する研究……………宗像俊太郎…………113

OUTLINE OF THE UNIVERSITY

The Nippon Veterinary and Life Science University has its origin in the Civil Veterinary School chartered by the Prefecture of Tokyo and established in 1881. It has remained as a privately supported school since its inauguration, and is now operated by the Nippon Foundation for Medical Education, Inc., Tokyo.

The University has a faculty of 123 members, of which 44 have a full professorial rank. It consists of the following two faculties, Veterinary Science and Applied Life Science. In the Faculty of Veterinary Science, there are two Schools : Veterinary Medicine and Veterinary Nursing and Technology. The Faculty of Applied Life Science, there two Schools : Animal Science and Food Science and Technology.

The academic year starts in April, and is divided into two semesters ending in July and March, respectively. Secondary school graduates who have completed 12 years' school education are admitted as freshmen.

After enrollment, the first two years of school work are mostly devoted for the liberal arts and sciences, and partly for the paratechnical courses. The students in the School of Veterinary Medicine are required to take another four-year period of professional education, which is one of the requirements for the national veterinary licence and Bachelor of Veterinary Medicine. In the School of Veterinary Nursing and Technology, Animal Science, and Food Science and Technology, the second two years are for the professional education, and successful completion of the four years of study enables the students to be qualified for a Bachelor of Science degree in veterinary nursing and technology, animal science or food science, respectively.

The University also offers a four-year graduate course in Veterinary Medicine. The completion of the course work and the thesis lead to a doctorate degree in Veterinary Medicine, equivalent to Ph D. Moreover, there is a two-year graduate course in Veterinary Nursing and Technology and applied life science. The completion of the course work and the thesis lead to a master's degree in Veterinary Nursing and Technology and applied life science, equivalent to MS.

As of December 1, 2012, the School of Veterinary Medicine has 22 Divisions, with the student enrollment of 567, while the School of Veterinary Nursing and Technology has 3 Divisions and 393 students. The School of Animal Science, with 10 Divisions, has the student enrollment of 364, while the School of Food Science and Technology has 11 Divisions and 346 students.

The alumni association has a membership of approximately 17,700, being one of the largest and oldest of this kind among the veterinary schools totaling 16 in Japan.
